

SARAD's environmental policy

1. Company profile

SARAD GmbH is a leading international company based in Dresden (Germany), which has specialized in the development, production and distribution of high-precision radiation and environmental protection technology for more than 30 years. Our solutions are used worldwide in environmental monitoring, occupational safety and in the nuclear sector (nuclear power plants, nuclear medicine, etc.), which is why the company bears a special social responsibility.

2. Commitment to the environment and sustainability

As a company in the field of environmental measurement technology, the protection of our natural resources is a central component of our self-image. We recognize our responsibility for the environment and are committed to resource-conserving and sustainable management.

3. Principles of our environmental policy

- **Legal compliance:** We comply with all relevant environmental laws, regulations and official requirements.
- **Conservation of resources:** We pay attention to the economical use of energy, materials and raw materials and focus on durable product design.
- **Waste avoidance:** Our production is geared towards waste reduction and reusability. We consistently separate waste and recycle it.
- **Emissions:** We continuously monitor and minimize emissions to air, water and soil.
- **Sustainable supply chain:** We prefer to work with partners who also pursue sustainability goals and promote regional suppliers to reduce transportation routes.

4. Climate protection & energy efficiency

SARAD GmbH strives to continuously reduce its carbon footprint.

This includes:

- Use of energy-efficient technology and LED lighting in production and offices
- Use of renewable energies in electricity procurement (e.g. through green electricity tariffs)
- Business trips according to the principle of necessity and preferably by public transport
- Promotion of working from home and digital communication to reduce traffic emissions

5. Products and innovations with an environmental impact

Our measuring devices contribute to the monitoring and reduction of harmful emissions worldwide. Through continuous research and development, we strive to make our products even more efficient, energy-saving and environmentally friendly.

6. Future prospects and goals

We have set ourselves the following goals for the coming years:

- Introduction of an environmental management system in accordance with DIN EN ISO 14001
- Development of new product lines with a focus on energy self-sufficient sensor technology
- Promotion of sustainability training for employees

7. Transparency & communication

We are happy to answer questions from our customers, partners and the public about our environmental responsibility and sustainability strategy. We gratefully accept suggestions for further improvement.

Managing Director of SARAD GmbH
